

John,

“You're high-profile and always out there-! You are one of our best Board members in recent years, too.”

Walter

-----

Walter,

First of all, thanks so much for the very nice complement. It is appreciated.

The way I see this is, I cannot comment on what may have transpired, happened, or even the way things were run before Deborah and I moved here, and since I really started getting involved myself. Basically, that is all water under the bridge. Past Boards are just that... past Boards. The future is now, and that is what I will deal with.

I can however say, that in my personal opinion, two main things recently happened that helped put everyone on the straight and narrow. One is simply replacing Trina with Todd over at Action Management. This happened even before I was officially appointed to the Boards itself; but I was also quite vocal and adamant in recommending that to the Board anyway, as then just a private citizen. Just this alone helped greatly with many of the things you bring up, such as proper and timely meeting notices on the front and back bulletin boards, the Terrace Topics, updating the Newport Terrace website, the timely input of our agenda and meeting notes on the Action Management website, and even creating the means for those with computers to receive available information online instead of by mail, thus saving a lot of time and money.

The other thing is, without tooting my own horn too much, I am now on the Board itself, and as Vice President. Simply put, I will question the things that need questioning, even from another Board member if necessary, or even something that I personally feel needs to be investigated. As you should know, I'm not afraid to take a stance on something that I believe in.

A sample case in this reference is the success of our recent Renovation Rollout efforts. This shows the success of a true team effort, and on something that the time has come.

John Sisker - Vice President  
Newport Terrace Board of Directors
